David Mantor
Phillipsburg, Kansas

Dear David: Your letter of some time ago bears no date so I dont know how overdue this answer is - but it's plenty I'm surex Actually I have a mind that is scientifically oriented, but my training is journalisticx However, my imagination is supplimented by exhaustive reading - and when ever I need technical advice, which is often and in many fields, I go ask an expert - and dont you think I dont get them up a tree ever so oftenx My son is a graduate of Colorado Mines and that covers a lot of territory in Science and he also has a degree from Florida U in Electronics - He helps plentyx While I hold no degrees, I am a practical geologist, paleontologist and I stomp around in anthropology with some assurancex I am 64x I created Alley Oop in 1930x I have no complete record of my caveman's many adventuresx How this knowledge can be of aid to you, I dont know... but you're welcome.

Regards
- V. T. Hamlin
